TINY HOUSE? OR JUST SENSIBLE DOWNSIZING?

More and more people are interested in downsizing, and the answer might be a tiny house. Regardless of shape, style or square footage, tiny houses help you live the simple life in a smaller, more efficient space.

People love tiny houses for environmental and financial reasons, but especially for the time and freedom of a simpler life. Living smaller simplifies life, is easier to afford and gentle on the environment. A tiny house helps you be self-sufficient and gives you time to enjoy life-enriching adventures of many kinds.

LOG CABIN LUXE

Four models, each available in four sizes, from 10'x16' to 12'x24', and each able to be trucked to a remote location and installed with minimal fuss and time.

INSPIRED BY NATURE

Tuck this little beauty in the woods or by the lake, wherever you need the comfort of home in its smallest form. Interiors are insulated and finished with pine – a nice touch for a fishing or hunting cabin, or your own place “to live more deliberately,” now affordable as never before.

A-FRAME COTTAGES

Everything you need in a compact package with a distinctive, efficient design! Our A-frame cottages go up in a flash, usually 2-3 days. Panelization improves construction quality, reduces costs, slashes on-site build time and avoids site disturbance. There are plenty of options – please inquire.

LITTLE HOMES, BIG POSSIBILITIES

Our tiny houses, log cabins and A-frame cottages have carefully crafted exterior details, and interiors come with wallboard, flooring, insulation and electricity. Our "Unibilt by JDM" tiny houses are plumbed as well, and come with carpet, cabinets, countertops and plumbing fixtures. Expertly designed and easy to transport, our cabins, cottages and tiny houses give you access to remote locations and install quickly with minimal site disturbance.
